#### About Genetic Technologies Limited

Genetic Technologies is a molecular diagnostics company that offers predictive testing and assessment tools to help physicians proactively manage women's health. The Company's lead product, BREVAGen<sup>plus</sup><sup>®</sup>, is a clinically validated risk assessment test for non-hereditary breast cancer and is first in its class. BREVAGen<sup>plus</sup><sup>®</sup> improves upon the predictive power of the first generation BREVAGen test and is designed to facilitate better informed decisions about breast cancer screening and preventive treatment plans. BREVAGen<sup>plus</sup><sup>®</sup> expands the application of BREVAGen from Caucasian women to include African-Americans and Hispanics, and is directed towards women aged 35 years or above, who have not had breast cancer and have one or more risk factors for developing breast cancer.

The Company has successfully launched the first generation BREVAGen test across the U.S. via its U.S. subsidiary Phenogen Sciences Inc. and the addition of BREVAGen<sup>plus</sup><sup>®</sup>, launched in October 2014, significantly expands the applicable market. The Company markets BREVAGen<sup>plus</sup><sup>®</sup> to healthcare professionals in comprehensive breast health care and imaging centres, as well as to obstetricians/gynaecologists (OBGYNs) and breast cancer risk assessment specialists (such as breast surgeons).
