

## ASX ANNOUNCEMENT

7 August 2018

---

### Swisstec Update

**Melbourne, Australia, 7 August 2018:** Genetic Technologies Limited (ASX: GTG; Nasdaq: GENE, “Company”, “GTG”), a diversified molecular diagnostics company embracing blockchain technologies across genomic testing platforms, provides the following updates to recent announcements with regards to collaborations with Swisstec Health Analytics Ltd. (“Swisstec”).

#### 1. Progress on Swisstec Heads of Agreement

The Sunset period to finalise a Proposed Joint Venture (refer 19 June 2018 announcement) to establish a new company to enable Swisstec and the Company to collaborate to develop a medical and health service platform using blockchain technology has expired. However, neither party has terminated the Heads of Agreement and the Heads of Agreement remains on foot unless it is subsequently terminated by either party on notice. The Company continues to progress discussions with Swisstec regarding the establishment of this new joint venture company and the parties are continuing to work together to identify potential collaborative opportunities.

#### 2. Arrangements with Swisstec regarding Asian distribution

The Company wishes to clarify that the agreement recently entered with Swisstec (refer 30 July 2018 announcement) sets out the principal commercial terms on which the Company intends to appoint Swisstec as a non-exclusive distributor for hospitals in Asia, and imposes binding obligations on the parties to negotiate in good faith in order to enter a formal distribution agreement. It is expected that formalisation and entry of a distribution agreement will occur once Swisstec has presented the Company with formal proposals for specific hospitals in the Asian region. Further updates will be provided in this regard as required.
